Descriptor de Acción

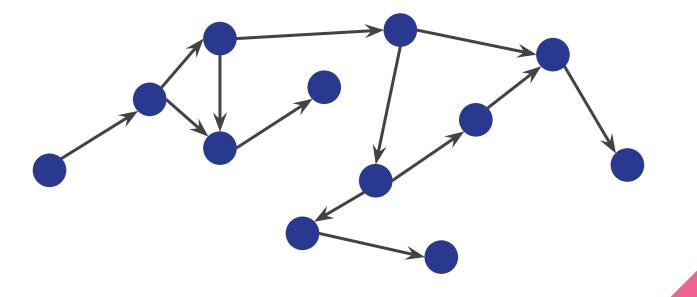

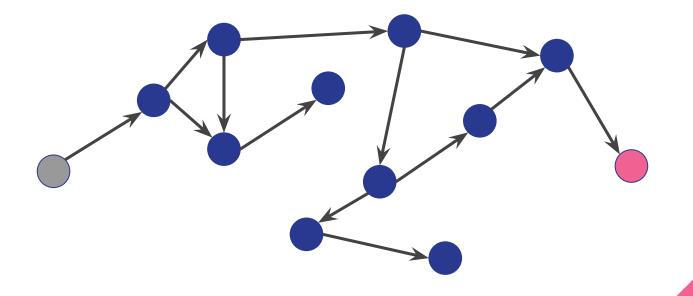

Descriptor de Acción

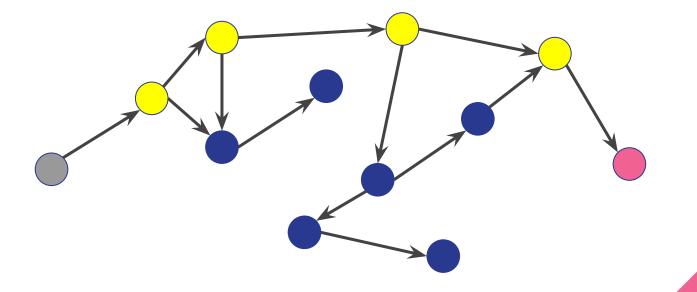

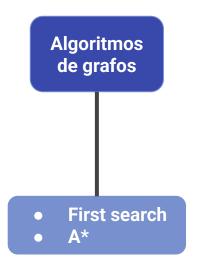

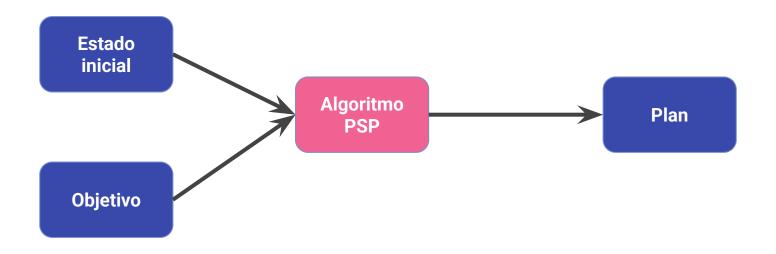

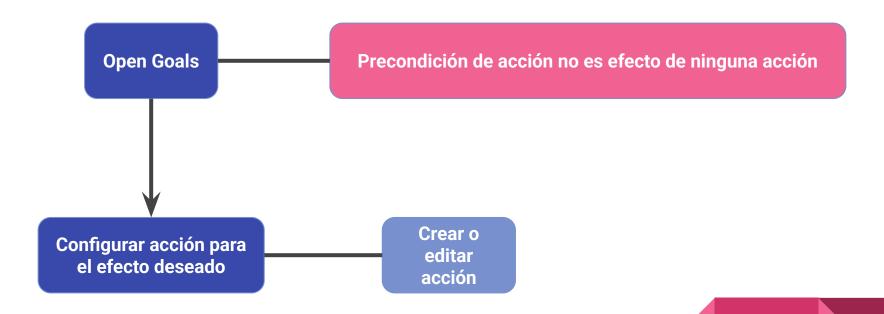

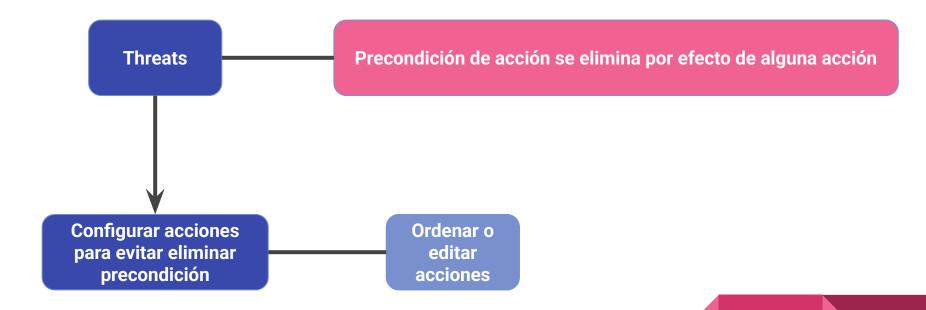

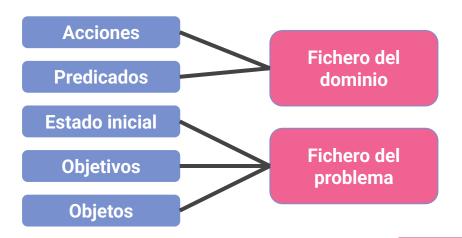

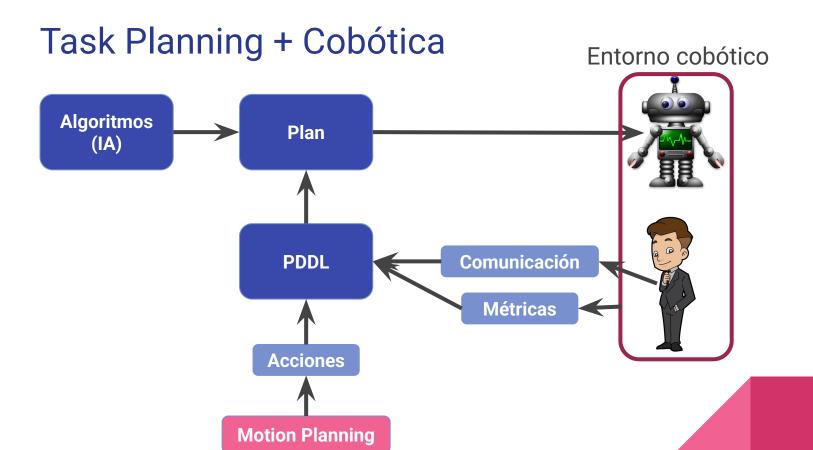

```
PSP(\pi)
    flaws \leftarrow \mathsf{OpenGoals}(\pi) \cup \mathsf{Threats}(\pi)
    if flaws = \emptyset then return(\pi)
    select any flaw \phi \in flaws
    resolvers \leftarrow \mathsf{Resolve}(\phi, \pi)
    if resolvers = \emptyset then return(failure)
    nondeterministically choose a resolver \rho \in resolvers
    \pi' \leftarrow \mathsf{Refine}(\rho, \pi)
    return(PSP(\pi'))
end
```
